Provider**

NEW ZEALAND
DERMATOLOGY &
SKIN CANCER CENTRE

THE NZDSCC

Our clinic specialises in complex skin cancer surgery, medical dermatology, dermatopathology, photo dynamic therapy and Mohs surgery.

We have recently gained our third Dermatologist, Dr John Snow, so now our ability to manage acute rapidly growing cutaneous cancer is enhanced. We can use margin controlled surgery (Mohs) where appropriate to maximize cure and minimize defect size compared with traditional plastic surgical techniques.

NZDSCC is the first team based dermatology practice in the Wellington region and therefore at least one of our dermatologists are present each day. This allows for vital second opinions and enables us to offer a wide range of services and provide the most effective and advanced treatments.

We would be happy to come and give lunch time or evening educational sessions, topics can be influenced by what the GP practice wants. We can come to your practice or we can host you at our clinic. Please contact Samantha via email nurse@nzdermatology or by phone 04 380 0125 to organise.
