Qualifications/Memberships

BMBS, FRACS

DR LAKSHMI RAVIKANTI

MB BS (Osmania); FRANZCOG

Obstetrician & Gynaecologist

Dr Lakshmi Ravikanti (MBBS, FRANZCOG) has a special interest in treating endometriosis – a leading cause of infertility – as well as pelvic floor disorders and infertility. She can easily empathise with patients, having personally suffered from endometriosis and had three cycles of IVF before falling pregnant with her son.

In March 2009, she was chosen to receive New Zealand's Young Gynaecologist of the Year Award by the Asia Oceania Federation of Obstetrics and Gynaecology. She also works as a consultant obstetrician and gynaecologist at Waikato Hospital.

DR VED PRAKASH SINGH

MB BS (Bombay); FRANZCOG

Obstetrician & Gynaecologist

Dr Ved Prakash (VP) Singh (MBBS, MD, FRANZCOG, FCPS) graduated from the University of Bombay, India and was part of a team that helped establish the first videolaparoscopy techniques in India during the early 1990s.

After moving to New Zealand in 1996, he was appointed as a consultant in obstetrics, gynaecology and reproductive medicine at Waikato Hospital in 2001. Dr Singh has continued to develop and refine many techniques of advanced laparoscopic and pelvic floor surgery, presenting and publishing papers internationally. He also specialises in endometriosis and reproductive medicine.

Southern Cross Heart Institute

Southern Cross Hospital in Hamilton is the home of **Southern Cross Heart Institute**, offering a range of cardiology services delivered in a state-of-the-art, purpose-built interventional cardiology suite.

Facilities include a new generation Philips Azurion image-guided therapy platform, one of the most advanced of its kind available in the world. The Azurion system boasts fusion of digital X-Ray technology, CT scan and 4D ultrasound (echocardiogram) of the heart in real time. Southern Cross Heart Institute brings together a highly skilled team of specialists at the Southern Cross hospital to perform a wide range of minimally invasive cardiac procedures which, until now, have been performed through conventional open heart operations. The 'hybrid' interventional suite supports cardiologists and cardiac surgeons in working together, and offers the latest treatment options for patients with heart disease.

A wide range of diagnostic and interventional cardiology treatments includes:

- Diagnostic coronary angiography and coronary angioplasty.
- Assessment of coronary plaques using intra coronary ultrasound scan and FFT / iFR technology.
- Echocardiography - 3D trans thoracic, 4D trans oesophageal and 3D intra cardiac echocardiography.
- Treatment of adult congenital heart disease - atrial septal defect (ASD), patent foramen ovale (PFO) ventricular septal defect (VSD), coarctation of the aorta and patent ductus arteriosus (PDA).
- Treatment for hypertrophic obstructive cardiomyopathy (HOCM) - trans-catheter ethanol septal ablation (TESA)
- Left atrial appendage occlusion - for prevention of stroke in patients with atrial fibrillation.
- Trans-catheter aortic valve implantation (TAVI) - replacement of aortic valve on a beating heart, under local anaesthesia
- Minimally invasive treatment of mitral regurgitation using MitraClip device.
